Mr. Scott Klodowski
Director of Sales & Marketing
Powerline Control Systems

Dear Scott,

I had the pleasure of attending your recent PulseWorx UPB Courses 101 and 102 at Home Controls, Inc., in San Diego. Your two part presentation and the ensuing technical discussions on Universal Power Bus technology – and how it is being aggressively driven and supported by PCS - gave me great reason to reassess negative opinions I previously held on the validity of UPB technology in today's automation marketplace.

Designers and installers like me need reliable and versatile control systems for our clients. You successfully demonstrated the fact product quality and good engineering reign supreme. I am now convinced we can rely 100% upon PulseWorx UPB solutions. I recommend others attend your courses and gain the confidence that UPB is a great solution done even better by the team at PCS. I enjoyed your teaching style and good-natured attitude, as well. You are an asset to our industry.

Sincerely yours,
